

Technical Information

TEGO® Antifoam D 2340

TEGO® Antifoam D 2340 is a deaerator for solvent free and solvent based systems. It is based on a polymer solution with a trace of silicone.

Physical properties

Delivery form	liquid
Non volatile content (2 h/105 °C)	approx. 15 %

Application

TEGO® Antifoam D 2340 combines defoaming and deaerating properties in

- unsaturated polyester resins
- epoxy systems
- PU resins
- Gel coats
- SMC and BMC

Used e. g. in adhesives for automotive applications and in the production of fibreglass.

Benefits

Based on its high compatibility TEGO® Antifoam D 2340 is also recommended for use in clear formulations.

TEGO® Antifoam D 2340 should be used, when high defoaming/deaerating efficiency is required.

TEGO® Antifoam D 2340 avoids negative side effects like surface defects as created by other additives.

Dosage/Handling

TEGO® Antifoam D 2340 has to be added to the dispersion as delivered.

Depending on the application the required dosage may vary from 0.3 % – 1.5 % of addition level on total formulation. Suitable screening test are therefore recommended.

Registration status

TEGO® Antifoam D 2340 respectively its ingredients are listed in the following inventories:

DSL, ECL, EINECS, ENCS, IECSC, PICCS, TSC

Based on the submitted information of our raw material suppliers we can confirm, that TEGO® Antifoam D 2340 is compliant with EC Regulation 1907/2006 (REACH).

Storage stability

TEGO® Antifoam D 2340 is stable in closed containers for a minimum of 12 months.

Packaging

20 kg steel can

Hazardous goods classification

Information concerning

- classification and labelling according to regulations for transport and for dangerous substances
- protective measures for storage and handling
- measures in case of accidents and fire
- toxicity and ecological effects

is given in our material safety data sheets.
